

ZeroLift

OUTRIGGER PAD RACK

Rack & Roll.

Tired of manhandling outrigger pads around your job site? DICA's ZeroLift Pad Rack is designed to protect your RT crane operators from lifting stress and injury. Simply slide the pads off the rack and roll them where needed. Pure and simple.

SMART

ZeroLift is a revolutionary safety product for RT cranes. It protects operators from the lifting stress of moving pads to and from the crane deck.

+

STRONG

Manufactured from high-strength tubular steel, ZeroLift weighs only 60 lbs., has a carry capacity of 1,000 lbs. and can fit pad sizes from 36" to 60".

+

SIMPLE

ZeroLift stows vertically and has minimal impact on crane ground clearance when deployed. Simply slide the pads off the rack and roll them where needed.

=

OPERATOR SAFETY

Why subject your crews to lifting stress and injury? ZeroLift delivers the simple, smart and safe solution that protects your operators.
