

Maintenance Free - Wood must be regularly maintained or it falls apart quickly. The TrainSmart Pole Barrier System is a 100% maintenance free engineered pole barrier system that will not fade, splinter or degrade in any way.

Easy to Use - TrainSmart Pole Barriers and bases easily separate allowing for hassle free transport, setup, breakdown and storage.

Super Strong - Able to withstand the normal wear and tear pole barriers are exposed to on a daily basis. TrainSmart Pole Barriers won't break, crack, chip or splinter.

Lightweight - TrainSmart Pole Barriers are constructed of a high strength engineered thermoplastic material. This material is significantly lighter than wood, making it a safer option to carry and set.

NCCCO Approved - TrainSmart was developed in conjunction with NCCCO to provide a maintenance free, easy to use and durable pole barrier solution. It is fully approved and endorsed for use by NCCCO.

SPECIFICATIONS

MODEL	TP-1000	POLE (Height)	36" from top of pole to ground (when inserted into the base)
WEIGHT	6.3 LBS	RED SECTION (Height)	12"
BASE (W x L x H)	12" X 12" X 1 1/2"	STRING	#18 Nylon String
BASE HOLE (Radius)	1 15/16"	TENNIS BALL	ITF Regulation
