TuffGrip™
HANDLE SYSTEM

BY  DICA

TuffGrip™ HANDLE SYSTEM

FEATURES & BENEFITS

Industrial Grade Toughness

TuffGrips™ won't wear out. With their rugged material and innovative design they provide the toughest, safest and highest performing handle we've ever created.

Ergonomic Safety

Every TuffGrip handle is a lifting point not exceeding 50 lbs. per person. This integrated system of handles provides a clear visual aid and significant ergonomic safety for operators.

Proper Lifting Technique

The length of every TuffGrip handle encourages operators to bend their knees and lift with their legs while keeping the load close to the body.

Jobsite Safety

With their ideal firmness, shape and length TuffGrip handles eliminate the risk of trip hazards from pads in a setup position.

Safety Orange

TuffGrips come in high visibility safety orange and are resistant to UV light, mud, chemicals and hydraulic fluids for a lifetime of use.

Availability and Sizing

The TuffGrip Handle System is available on all Light, Medium, Heavy Duty* and Dunnage Safety Tech Pads. Handle diameter is 0.5" thick for all 1.0" and 1.5" pads and 2.0" pads** have a 5/8" thick handle for a reliable and comfortable grip on every Safety Tech Pad.

Lifetime Guarantee

If you break it, we'll replace it. Guaranteed. Like all Safety Tech Pads, TuffGrip handles are free from defect in material or craftsmanship for a lifetime of safety and performance.

* Not currently available on Heavy Duty DR362, DR482 and DR602 Safety Tech pads.

** D15152 has a 0.5" handle due to its 14.0 lbs. weight.

DICA Safety Tech Pad Features

Safety Texturing, Memory Recovery and Lightweight.

DICA Lifetime Guarantee

If you break it, we'll replace it. Guaranteed.
