

THE LIGHTEST CRANE PADS IN THE WORLD

DICA's engineered, fully molded, one-piece **FiberMax® Crane Pads** optimize load distribution in four directions to predictably and effectively distribute highly concentrated outrigger loads. This design allows for float placement anywhere on the pad.

Weighing 60% less than typical steel pads, steel plate and wood pads, FiberMax Pads consistently reduce transportation and operating costs for you.

- **Typically 60% Lighter than Steel Pads, Steel Plate and Wood Pads**
- **Superior Load Distribution**
- **Faster Setup and Teardown Times**
- **Model Specific Owner's Manual**
- **Available in 3D Lift Plan**

EXCEPTIONAL STRENGTH

Engineered to provide maximum strength, rigidity and lightweight performance for cranes with lifting capacities up to 500 tons.

LIGHTWEIGHT

FiberMax Pads allow you to setup and tear down up to 75% faster and free up room for other equipment on your trailer.

LOWER COSTS

Lighter weight allows for the elimination of a dedicated truck and trailer, overweight permits and the challenges that go with them.

"We thought DICA's 8'x5'x10" crane pads would weigh a lot more than our forklift capacity. When we found out they only weighed 1,290 pounds, we couldn't believe something so large could weigh so little!"
