

SlatTrax Ground Protection Roads

Get from your starting to ending point faster and with less effort than ever before! SlatTrax® temporary roadways require fewer crew members and less effort than the comparable linear feet of plastic ground protection mats or plywood sheets.

SlatTrax® temporary roadways can be used on grass, turf fields, sand, and hardscape. For any surface, you can use ground protection mats or plywood—you can use SlatTrax.

KEY FEATURES

- ▶ Deploy or retrieve 100 linear feet of roadway in minutes.
- ▶ Simple and easy to layout, retrieve, and store.
- ▶ Avoid unnecessary injuries and fatigue.
- ▶ Sections connect for different road lengths and stability.
- ▶ Choose DIY (manual) or Hydraulically-Powered systems.
- ▶ Made in the USA.

SlatTrax System Options

DIY Man-Powered

ROAD WIDTH	SECTION WEIGHT	TOTAL WEIGHT	PRICE
