

Pole Hole Covers

Utility companies use DICA Pole Hole Covers to meet OSHA requirements and temporarily cover open holes with a tool that's easy to store, easy to find and easy to use by a single operator. Stakes can be driven into the ground to hold the cover in place and their Hi-Viz Yellow coloring makes them easily distinguishable from the surrounding surfaces.

Use the hand-holds to lift, carry or roll. DICA's Pole Hole Covers have a maximum rated capacity of 500 pounds and are manufactured using engineered thermoplastic in both circle and rectangle designs.

KEY FEATURES

- ▶ **Manufactured using engineered thermoplastic for repeated use.**
- ▶ **Functional design can be easily stored and deployed securely.**
- ▶ **Both circle and rectangle designs have a 500 pound maximum rated capacity.**
- ▶ **Satisfies hole cover requirements of OSHA.**
- ▶ **Made in the USA.**
