## Ground Protection Guide

for Veterans Cemeteries

We want to help you in maintaining your cemeteries *“as national shrines, sacred to the honor and memory of those interred or memorialized there.”*

Our SlatTrax system has become a mainstay for many federal and state veterans' cemeteries deploying and retrieving 100 Linear Feet (LF) of temporary roadway in less than two minutes with a single operator.

Deployed Trax provide access while protecting the ground conditions.

The Trax roadway supports equipment in crypt and traditional sites.

Site clearance and supplies transferred using SlatTrax.

## Adjustable Spread Hydraulic Powered System (HPS)

### Adjustable Spread with 36" & 42" Wide Trax

- Dual Spool with (8) 12.5 LF or (4) 25 LF Connected Section
- Adjustable Spread (AS): Trax Coverage 80"-104" Outer Edges
- AS HPS Dimensions: 94" x 60" x 48"; 2,850 lbs.

## Fixed Spread Hydraulic Powered System (HPS)

### Fixed Spread with 36" Wide Trax

- Dual Spool with (8) 12.5 LF or (4) 25 LF Connected Section
- Fixed Spread (FS): Trax Coverage 80" Outer Edge to Edge
- FS HPS Dimensions: 94" x 60" x 48"; 2,342 lbs.

### SAFETY

The Hydraulic Powered Systems are safer than manual options – laying plywood increases the risk of injuries.

### SPEED

The HPS deploys and retrieves 100 linear feet of ground protection in less than two minutes – ultimate productivity for crew.

### SIMPLICITY

Typical operation of HPS can be handled with one operator. Multiple roadways can be set and removed in succession.

## Additional Trax

### For Additional 36", 42", and 48" Roads or Extensions

- Total Length - 100 LF Units
- Eight (8) 12.5 LF Folded Sections of 36" Width Trax
- Palletized Dimensions: 36" x 42" x 48" / 910 lbs - 1,030 lbs

## SlatTrax DIY

### Manually Handled 36", 42" or 48" SlatTrax Palletized Road System

- Eight (8) 12.5 LF Sections of Trax Stage at set up point
- Simple "drag, drop, connect" procedure
- Dimensions: 36" x 42" x 48" / 910 lbs - 1,030 lbs

## SlatTrax Overview

SlatTrax was designed and developed to address issues identified by NCA personnel to provide a mechanically-powered system to deploy and retrieve temporary roadways for interment procedures.

SlatTrax can be purchased direct from DICA as well as through State/Federal contracting, including meeting DSVOB requirements.

We can provide resources and assistance to help you procure this unique, award-winning system for your operations, including references to U.S. Veterans' Cemeteries using SlatTrax.

- ▶ Standard HPS is offered with 100 LF of dual Trax; capacity can handle 125 LF
- ▶ Introductory training advice, materials, and video provided
- ▶ Repair Kits are available for minor damages incurred
- ▶ One year warranty applies to HPS and Trax
